

# Super Seasons

This session is especially designed for early years, nursery and foundation learners. Designed to provide a starting block for nature and outdoor learning, this session uses sensory games to introduce the natural world to our young students.

Using games, stories, puppets and nature walks, children will use their five senses to explore the natural world.

Our 'Awesome Autumn', 'Springy Spring', 'Wonderful Winter' and 'Super Summer' themes provide an all year round experience and give the children an opportunity to gain confidence and an experience of learning outside the classroom. The session is also designed to give young learners an engaging experience and introduction them to one of the most amazing open spaces in England.
