### **Briefing Note Eastern Cluster Utility Works**

#### **A10 Bishopsgate**

Transport for London (TfL) have been liaising with the City of London, UKPN and their contractor to co-ordinate works for the purpose of installing electrical cables into the highway, ensuring minimal impact is had on the users of the road network. Where possible, arrangements have and will be made for shared works (other utilities using the same closure) to take place.

Since 19<sup>th</sup> September 2011 there has been a northbound closure of Gracechurch St & Bishopsgate between Fenchurch St & Camomile St in order to facilitate the installation of ducts for a 33kv electricity supply cable to connect a number of developments in the east of the City from the UK Power Networks (UKPN) sub-station located near to Ludgate Hill in the west of the City

The above closure has been temporarily removed in order to facilitate the Lord Mayor's Show, which will be taking place on Saturday 12<sup>th</sup> November 2011.

In order for UKPN to continue with their installation programme the northbound closure will be re-introduced on Sunday 13<sup>th</sup> November at 1200 midday.

In addition to the northbound closure UKPN will be starting a new phase of their works, at the junction of Bishopsgate and Leadenhall Street. The works at this location are expected to take place over a period of 2 weeks and involve the use of 3-way temporary signals on this junction.
